

Master Executive Portfolio

Executive Overview

This portfolio represents a comprehensive data science suite across five industry verticals: Healthcare, Sales, E-commerce, Sports, and Finance.

Each module demonstrates a full-stack data lifecycle: from raw data ingestion and cleaning to advanced modeling and visualization.

Strategic Methodology

We utilized Python-based ETL pipelines to ensure data integrity and Streamlit for interactive deployment.

Statistical modeling and machine learning (K-Means) were applied to extract non-obvious business patterns.
